OBJECTIVE

Detail-oriented Software Engineering student with a strong foundation in OOP, data structures, and software development, seeking a part-time Software Tester position to apply skills in manual and automated testing, bug tracking, and UI/UX consistency checks across web and mobile platforms, while contributing to faster, higher-quality releases.

EDUCATION

B.Sc. in Software Engineering

2nd Year, 1st Semester | CGPA: 2.72 / 4.00

Higher Secondary Certificate (HSC) — Science

Government Science College | GPA: 4.75 / 5.00

Secondary School Certificate (SSC) — Science

Darunnajat Siddikia Kamil Madrasah | GPA: 5.00 / 5.00

RELEVANT COURSEWORK

Data Structures & Algorithms, Object-Oriented Programming, Discrete Mathematics & Introduction to Software Engineering.

TECHNICAL SKILLS

- **Programming Languages:** C, C++, Java, HTML
- **Concepts:** Object-Oriented Programming, Data Structures fundamentals & Algorithms
- **Tools:** Git, GitHub, Maven, IntelliJ IDEA, CODEBLOCKS, VS CODE

SOFT SKILLS

Problem-Solving, Teamwork, Communication & Public Speaking

PROJECTS

Radar Target Tracking Simulator | Java, JavaFX, Maven, OOP [Radar Target Tracking Simulator](#)

- Built a JavaFX-based desktop simulation of a radar target tracking and interception workflow for aircraft, drone, and missile targets.
- Implemented automatic target authorization, a multi-level threat assessment system (LOW/MEDIUM/HIGH/CRITICAL), and interceptor deployment logic.
- Applied core OOP principles including inheritance, polymorphism, encapsulation, and composition across the target, interceptor, and command-centre classes.

Smart Library Management System | Java, JavaFX, Maven, OOP | Github [Smart Library Management System](#)

- Developed a **JavaFX-based Smart Library Management System** using Java, Maven, and a service-layer OOP architecture.
- Implemented **file-based data persistence**, animated authentication flow, and **light/dark theme switching** for an enhanced user experience.
- Configured a **GitHub Actions CI/CD pipeline** to automate builds and generate native **macOS and Windows installers** using **jlink** and **jpackage**.
- Applied **object-oriented design principles** to create a modular, maintainable, and scalable desktop application.

CERTIFICATIONS & TRAINING

- Presentation and Public Speaking Course — Ten Minute School (2022)
